ROAD SAFETY PRODUCTS - TRAFFIC WARNING EQUIPMENT

Trailer with boards of variable content MVMS

MVMS (Mobile Variable Message Signs), that is, mobile signs of variable content, give the possibility to display any road signs together with text information. Improve road safety, inform / warn drivers of handicaps or signal changes route. One of the biggest advantages of MVMS is the application (on smartphone / tablet), which allows remote management of the product. This application allows you to view the actual setting of characters and check the status of the device.

My Devices	Brightness	Temperature	Parameters	Maintenance
Time			17:12:20	⚠
